EDUCATION

University of Waterloo

Honours Mathematics (Co-op)

Waterloo, ON

Sep 2025 – Apr 2030

- **Relevant Coursework:** Data Structures & Algorithms, Functional Programming, Algebra, Calculus, Linear Algebra, Physics, Economics, Combinatorics
- **Award:** University of Waterloo President's Scholarship of Distinction (2025)

EXPERIENCE

Research Assistant in Business Analytics

Hamburg University of Technology (TUHH) — React, FastAPI, Electron, Python, SQLite, Selenium

Apr 2026 – Present

Hamburg, Germany

- Developed a **full-stack desktop application** (React, FastAPI, Electron) for ConFlowGen, an open-source PyPI/conda-forge library, enabling non-technical researchers to generate synthetic maritime container datasets without Python or CLI knowledge.
- Architected a REST API wrapping the ConFlowGen Python API, featuring SSE-based real-time log streaming, SQLite-backed scenario management, CSV import, and **zero-dependency deployment** via a bundled Python 3.12 runtime.
- Engineered an automated data-cleaning pipeline that parsed nested JSON and standardized mixed-format timestamps across a **5,000-record** dataset of inland waterway notices spanning 4 countries, producing a validated **4,743-row** export.

Undergraduate Reading Program Participant

Combinatorics & Optimization, University of Waterloo (WIM DRP)

May 2026 – Present

Waterloo, ON

- Selected for the **competitive Women in Mathematics Directed Reading Program** to study computational origami and geometric folding theory under faculty mentorship, analyzing flat-foldability, crease-pattern validity, and graph-theoretic models of fold sequences through combinatorics and algorithm design.

PROJECTS

empowHER | Next.js, React, TypeScript, Python, FastAPI, IBM watsonx.ai | **IBM Runner-Up, GenAI '26** | [Devpost](#) 2026

- Built a **full-stack AI healthcare platform** delivering visit transcription and automated care-plan generation, engineering backend pipelines that converted unstructured medical data into structured JSON via IBM watsonx.ai LLMs.
- Designed an interactive React dashboard tracking care-readiness scores, symptom trends, and patient-coordination workflows.

AI Settlement Assistant Platform | React, Firebase, Google Maps API, Gemini AI | [Devpost](#)

2026

- Built a **profile-driven platform** personalizing newcomer guidance across housing, employment, and services, using Firebase Firestore and the Google Maps API for real-time state management and location-based discovery.
- Integrated a Gemini AI multilingual chatbot delivering context-aware, profile-scoped responses across **20+ languages**.

LEADERSHIP & ACTIVITIES

Editor-in-Chief

Humberside Collegiate Institute

Sep 2024 – Jul 2025

Toronto, ON

- Directed **10 subteams** of **30+ contributors** to design, produce, and deliver the annual yearbook to a student body of **2,000+**; coordinated across clubs, student council, faculty, and administration and contributed original event photography.

Assistant Badminton Coach

Etobicoke Junior Badminton Club

Sep 2022 – Jul 2025

Toronto, ON

- Coached **30+ youth players** over 3 years and managed a team of volunteers, tracking their schedules and service hours while developing players' technique through structured drills and individualized feedback.

SKILLS & INTERESTS

Languages: Python, Java, TypeScript, JavaScript, C, SQL

Frameworks/Libraries: React, Next.js, FastAPI, Flask, Express, Electron, Pandas, Matplotlib

Tools & Testing: SQLite, Firebase, Git, REST APIs, SSE, IBM watsonx.ai, OpenAI API, Gemini AI, Selenium, Pytest

Interests: Poker, Badminton, Photography, Painting and Hiking [*check my website to see!*]
